If I move from this address, I will provide the City of Decatur a written notice stating the date of disconnection, the forwarding address and a telephone number where I can be contacted. I understand that I am responsible for the utility bill until the City of Decatur receives a completed Application for Transfer, Suspension or Termination of Service Form.

Signature Date

CITY OF DECATUR
Water Service Agreement
Read and Sign Below

I. PURPOSE. The City of Decatur is responsible for protecting the drinking water supply from contaminations or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions which are in place to provide protection. The utility enforces these restrictions to insure the public health and welfare. Each customer must sign this agreement before the City of Decatur will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.

- II. PLUMBING RESTRICTIONS.** The following undesirable plumbing practices are prohibited by State regulations.
- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
 - B. No cross-connection between the public drinking water supply and a private water service is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
 - C. No connection which allows condensing, cooling or industrial process water to be returned to the public drinking water supply is permitted.
 - D. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
 - E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.

III. SERVICE AGREEMENT. The following are the terms of the service agreement between the City of Decatur (the Water System) and _____ (print customer's name)

- A. The Water System will maintain a copy of this agreement as long as the Customer and/or the premises connected to the Water System.
- B. The Customer shall allow his property to be inspected for possible cross-connections and other undesirable plumbing practices. These inspections shall be conducted during the Water System's normal business hours.
- C. The Water System shall notify the Customer in writing of any cross-connection and other undesirable plumbing practice which has been identified during the initial inspection or the periodic re-inspection.
- D. The Customer shall immediately correct any undesirable plumbing practice on his premises.
- E. The Customer shall, at his expense, properly install, test and maintain any backflow prevention device require by the Water System. Copies of all testing and maintenance records shall be provided to the Water System.

IV. ENFORCEMENT. If the Customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test and maintain an appropriate backflow prevention device at the service connection. Any expense associated with the enforcement of this agreement shall be billed to the Customer.
